Due to the nature of our products we do not accept product returns. We shall not be held responsible for product and container compatibility or for the outcome of your products and formulas.

### Damaged Goods During Transport

If goods are damaged during transport and there are visible signs of damage to the box for example the box is wet and or stained due to product leakage and there is a strong aroma as if something has leaked, and or the box is crushed or looks as though it has been tampered with, then it shall be your responsibility to refuse the package. Insist that the box be returned to the sender. If you accept the package, open it and then find any damage to the contents – please contact our office immediately to report the damage. Do not discard the damaged goods and or destroy the packaging and box that the goods came in. In most cases if we need to file an insurance claim with the courier company then an inspection agent will need to see the damaged goods.

### Wholesale

Wholesale pricing is available to persons with registered businesses as Certified Aromatherapists, Registered Massage Therapists, Natural Health Care Practitioners, Spa and Therapy Centres, Aesthetic Salons and Retail Stores.

Wholesale pricing is also available to students of Aromatherapy, Aesthetics, and Massage Therapy who are registered with an accredited school.

### *Carrier Oils & Semi Solid Oils*

It is common for your product to become cloudy when you add ingredients. Solublizers are added to commercial products to keep them clear. While we can purchase solubilizers to include in our catalogue we don't feel it is a necessary ingredient. Solubilizers tend to be sulphated and are produced via a method known as ethoxylation, which uses ethyl alcohol and thus produces a Laureth product. Laureth products tend to irritate the skin when used in high concentrations. 500 ml, 1 litre & 4 litres sizes available and 800 g and 1600 g sizes available.

## *Hydrosols/ Floral Waters*

When plant material is exposed to steam (distillation) the resulting product is an essential oil and the water left over from the condensation process is termed a hydrosol or floral water. Hydrosols may be applied directly to the skin as a spray, splash or compress. Hydrosols used alone may hydrate, tone, soothe and refresh the skin. Hydrosols are also used in the formulations of body care products such as creams, lotions, gels and masks. We do not endorse the use of hydrosols for internal use. 500 ml, 1 litre and 4 litre sizes available.

### Toby – Aromatherapy Spray for Dogs

Toby was one of seven golden retriever puppies born to Tasha in the summer of 2000. Toby was a gentle soul with big brown eyes that made everyone's heart melt. After his siblings left to live with other families, Toby spent most of his days walking in our woods, playing in the creek, and getting very muddy with his mother Tasha. Sadly, Toby was diagnosed with spinal cancer. He barely lived 2 years, yet he touched and softened the hearts of many. Since Toby loved being groomed, and since our family is in the Aromatherapy business, in memory of Toby, we have made an all natural deodorizing spray that will certainly make your furry friends smell better. Frankly, the Aromatherapy is for you! Let's face it—what dog wants to smell like flowers when he or she could roll in stinky mud!

4503	240 ml spray	\$20.35
------	--------------	---------

For every bottle of Toby purchased our family business will donate \$1.00 to the Pet Trust Fund at the Veterinary College, University of Guelph. For more information visit [www.pettrust.ca](http://www.pettrust.ca).

------	------	---------

**Unscented Walnut Body Scrub** - Botanically-derived cleansing agents combined with sea algae extract lift impurities from the surface of the skin while the ground walnut removes dead surface cells. This process encourages new cell production, refines the texture and improves the vibrancy of the skin. Stimulating the skin in this manner also encourages blood circulation to the surface of the skin, which in turn stimulates the lymphatic system.

Ideally, a full body exfoliation should be exercised once a week. You may add other ingredients to this unscented body scrub to create your own custom designed formulas.

### *Lip Balm - Suggested Recipe*

1 Tablespoon bees wax beads, 1 tablespoon Jojoba oil or other oil, 1/4 teaspoon honey and 6—12 drops of flavour. Melt bees wax slowly on low heat, add other ingredients and stir well.

Pour into tubes—makes approximately 6 tubes. Stand tubes in a tray of rice or sand to prevent them from tipping over.

### *Melt & Pour Soap Making Directions*

Melt soap in a double boiler. Keep covered to prevent moisture loss. If you continually melt and re-harden the same batch it will turn out flaky and crumbly. You can also melt in a glass covered casserole dish in the microwave. Use a low setting for 2—3 minutes. Don't stir like crazy or you'll create bubbles.

When adding powdered colours, don't add directly to the batch otherwise it will clump. Like gravy making, mix your colour with a small amount of the warm liquid soap in a small dish and mix into a paste. Then add back to your larger batch. Use about 1/8 to 1/4 teaspoon of colour per pound of soap.

Scenting is easy, you can use just about anything. Your favourite perfume if you like, essential oils, or fragrant oils. How much fragrance to add is your personal preference. It is recommended that you use 1/2 to 1 teaspoon of fragrance per pound of soap. Remember that if the essential oil or fragrance is amber or dark in colour, the colour will affect the final appearance.

You can also add other ingredients to create nourishing properties. Whether dry or wet additives don't use more than 1/8 of a cup per pound of soap. Such additives could be, almond oil, coconut oil, jojoba oil, vitamin e, herbal tea, coffee, cream, oatmeal, ground almond, cinnamon, nutmeg, etc. Again, the colour of your additives will affect the outcome of your soap product.

Once you have added your ingredients, stir gently and evenly, keeping soap warm. Pour into moulds. As the soap hardens little air bubbles will surface. It's best to almost overflow your moulds so that you can shave off the aerated surface. You can save these shavings and when you have enough, create a kaleidoscope soap. Suggestions for moulds, cookie cutters, candy moulds and yogurt containers. Another idea is to buy those long white rubbermaid drawer organizer trays from Canadian Tire. You can make a long block of soap and afterwards cut the bars into the sizes you like. If you have trouble getting the soap out of the molds place them in a shallow dish of hot water for a few minutes.

If you use a mould that is open at both ends such as a cookie cutter you will need to seal the edges first. Pour a little of your soap onto a flat surface then place the cookie cutter into the centre of the puddle. Let it harden then pour the remainder of the soap into the mould.

Your soap will be ready to use as soon as it hardens. Wrap in saran wrap to keep fresh. Enjoy!!
