

#1011 Skin Firming Body Serum (lightly scented with pure essential oils)

The hydrolyzed wheat protein used in this product firms and tones the skin while locking in the other amazing nutrients packed into this rich serum. As well, wheat protein has become a proven ingredient in many skin care products to help smooth and relax fine lines. As with many of our new spa products this product contains sea algae extract, which detoxifies while improving circulation. Dipalmitoyl hydroxyproline is a relatively new ingredient, an amino acid found in plant material. This botanical is now popping up in many new high-end skin care product lines. The ingredient has been proven to rejuvenate the appearance and fights against the cumulative effects of aging. It also assists in controlling free radicals and helps moisturize, smooth, and firm the skin.

Due to the rich moisture locking properties of this serum it is an excellent choice for finishing-up a treatment in the spa. Apply at the end of a massage, body wrap or following a salt glow, exfoliation or body mask.

It can be used in place of a moisturizer 1 – 2 times per week after bathing and between regular spa body treatments.

An excellent product to send home with your client to use between visits. Encouraging them to return every six weeks for their regular body wrap and massage treatment.

In the spa – A stimulating massage, hot stone treatment, body wrap or exfoliation treatment should be performed prior to the application of this product. Apply a thin veil to the desired area massaging in circular motions,

At home treatment – For best results apply after bath and using a body exfoliation product such as our Thai Body Scrub or Lemon Chiffon Body Polish. Apply a thin veil to the entire body paying special attention to the thighs, upper arms, neck and décolleté area. Rinsing is not required.

Ingredients: spring water, apricot kernel oil, sea algae extracts, glycerin, cocoglucoside (natural thickening agent), dipalmitoyl hydroxyproline, palmitoyl hydrolyzed wheat protein, methylsilanol mannuronate, essential oils of lemon, litsea cubeba, ylang ylang, mimosa, jasmine, nutmeg, linden blossom, Japanese honeysuckle and lecithin.
